---

## 2 RUNNING APPLICATION

The signup procedure is accessible via the File menu. Basic functionality is implemented for users, but some things need planned out for later:

1. invalid name/password characters
2. identical usernames
3. minimum password length
4. canceling the signup procedure
5. forcing legal input on both fields upon pressing OK

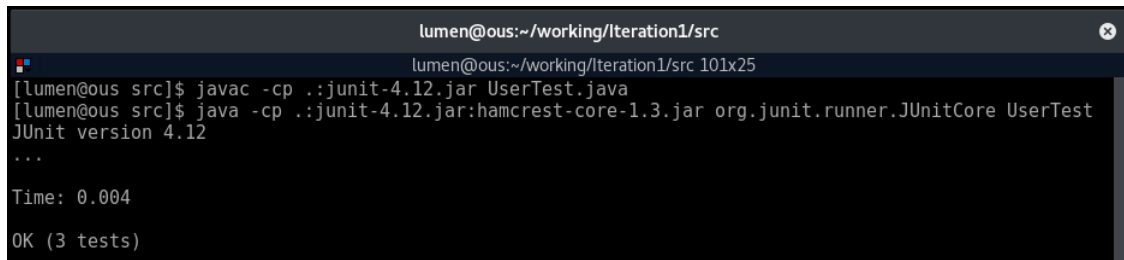

The about screen is accessible via the Help menu.

---

### 3 JUNIT COVERAGE

Current trivial tests:

1. tests default constructor for first name
2. tests default constructor for password
3. tests User.class toString()

A terminal window with a dark background and light text. The title bar at the top reads 'lumen@ous:~/working/Iteration1/src' with a close button on the right. The terminal content shows the following commands and output:

```
lumen@ous:~/working/Iteration1/src
[~lumen@ous src]$ javac -cp .:junit-4.12.jar UserTest.java
[~lumen@ous src]$ java -cp .:junit-4.12.jar:hamcrest-core-1.3.jar org.junit.runner.JUnitCore UserTest
JUnit version 4.12
...
Time: 0.004
OK (3 tests)
```
